Protection

Gain cloud data visibility

Enforce DLP policies & control sharing

Visibility to sharing level and classification labels

Quantify exposure and risk

Detect and manage 3rd apps access

Govern data in the cloud with granular DLP policies

Leverage Microsoft and 3rd party DLP engines for classification

Azure security connectors

Azure Information Protection settings

- Automatically scan new files for Azure Information Protection classification labels and content inspection warnings
- Only scan files for Azure Information Protection classification labels and content inspection warnings from this tenant
